TABLE DESIGN

TABLE NO: 1

Name: login

Primary key:logid

Description: It stores all user login details

Field	Data type	constraint	Description
logid	int	Primay key	It is store the login id
username	varchar	Not null	It is store the username for login
password	varchar	Not null	It is store the password for login
usertype	Int	Not null	It is store the usertype
status	int	Not null	It is store the status

TABLE NO: 2

Name: creg

Primary key:customid

Foreign key:logid reference login and disid reference district

Description: It stores the customer details

Field	Data type	constraint	Description
customid	int	Primary key	It is store the customer id
logid	int	Foreign key	It is store the login id
name	varchar	Not null	It is store the name
phone no	int	Not null	It is store the phone no
Email	Varchar	Not null	It is store the email id
housename	varchar	Not null	It is store the housename
Disid	Int	Foreign key	It is store the district id
city	Varchar	Not null	It is store the city
pincode	Int	Not null	It is store the pincode
Status	Int	Not null	It store the status

TABLE NO: 3

Name: spreg

Primary key:spid

Foreign key:logid reference login and disid reference district and sid reference addservice

Description:It stores the service provider details

Field	Data type	constraint	Description
spid	Int	Primay key	It is store the service provider id
logid	Int	Foreign key	It is store the login id
name	Varchar	Not null	It is store the name
phoneno	Int	Not null	It is store the phone no
Email	Varchar	Not null	It is store the email
gender	Varchar	Not null	It is store the gender
dob	Date	Not null	It is store the date of birth
housename	Varchar	Not null	It store the housename
disid	Int	Foreign key	It store the district id
city	Varchar	Not null	It store the city
Pincode	Int	Not null	It store the pincode
sid	Int	Foreign key	It is store the service id
idproof	Varchar	Not null	It is store the idproof
Status	Int	Not null	It store the status

Booked	Int	Not null	It store the booked status

TABLE NO: 4

Name: district

Primary key:disid

Description:It stores the district details

Field	Data type	Constraint	Description
disid	int	Primary key	It is store the district id
name	int	Not null	It store the district name

TABLE NO: 5

Name: addservice

Primary key :sid

Description:It stores the service details

Field	Data type	Constraint	Description
sid	int	Primay key	It is store the service id
service	Varchar	Not null	It store the service name
description	Varchar	Not null	It store the description
pricedetails	Varchar	Not null	It store the price details
instructions	Varchar	Not null	It store the instructions

TABLE NO: 6

Name: bookservice

Primary key: bid

Foreignkey: customid reference creg and sid reference addservice

Description:It stores the service details

Field	Data type	Constraint	Description
bid	int	Primary key	It is store the booking id
Customid	Int	Foreign key	It store the customer id
Sid	Int	Not null	It store the service id
scheduledate	Date	Not null	It store the schedule date
requirement	varchar	Not null	It store the requirement
Duration	varchar	Not null	It store the duration of working
Num	Int	Not null	It store the number of workers
Paymentmode	varchar	Not null	It store the payment mode

TABLE NO: 7

Name: feedback

Primary key: fid

Foreignkey: logid reference login

Description:It stores the feedback

Field	Data type	Constraint	Description
fid	Int	Primary key	It is store the feedback id
Logid	int	Foreign key	It store the login id
Username	Varchar	Not null	It store the username
Feedback	Varchar	Not null	It strore the feedback

TABLE NO: 8

Name: compreg

Primary key: cid

Foreignkey: logid reference login

Description:It stores the company details

Field	Data type	Constraint	Description
cid	int	Primary key	Company id
Logid	int	Foreign key	login id
name	Varchar	Not null	Name
Contact no	int	Not null	Contact no
Email id	varchar	Not null	Email id

TABLE NO: 9

Name: delreg

Primary key: did

Foreignkey: logid reference login

Description:It stores the deliveryboy details

Field	Data type	Constraint	Description
did	Int	Primary key	Delivery boy id
Logid	Int	Foreign key	login id
name	Varchar	Not null	Name
Contact no	int	Not null	Contact no
location	varchar	Not null	Location
Email id	varchar	Not null	Email id

TABLE NO: 10

Name: item

Primary key: itemid

Foreignkey: catid reference category

Description:It stores the item details

Field	Data type	Constraint	Description
itemid	Int	Primary key	Itemid
catid	Int	Foreign key	login id
Item name	Varchar	Not null	Item name

image	Varchar	Not null	Image
price	Int	Not null	Price
specification	varchar	Not null	Specification
description	varchar	Not null	Description
status	varchar	Not null	Status

TABLE NO: 11

Name: category

Primary key: catid

Description:It stores the category of items

Field	Data type	Constraint	Description
catid	int	Primary key	category id
Category name	varchar	Not null	Category name
status	Varchar	Not null	Status

TABLE NO: 12

Name: order

Primary key: orderid

Foreignkey: logid reference login and itemid reference item

Description:It stores the order details

Field	Data type	Constraint	Description
Orderid	Int	Primary key	Order id
Logid	Int	Foreign key	login id
Itemid	Int	Foreign key	Item id
Quantity	Int	Not null	Quantity
Price	int	Not null	price
Date	Date	Not null	Date

TABLE NO: 13

Name: cart

Primary key: cartid

Foreignkey: logid reference login and orderid reference order

Description:It stores the cart details

Field	Data type	Constraint	Description
Cartid	int	Primary key	Order id
Logid	int	Foreign key	login id
orderid	int	Foreign key	Item id
Quantity	int	Not null	Quantity

Price	int	Not null	price

TABLE NO: 14

Name: payment

Primary key: pid

Foreignkey: logid reference login

Description:It stores the payment details

Field	Data type	Constraint	Description
Pid	int	Primary key	payment id
Logid	int	Foreign key	login id
Cardtype	varchar	Not null	Card type
Cardholdername	varchar	Not null	Card holder name
Cardnumber	int	Not null	Card number
Totalamount	int	Not null	Total amount
